Address \_\_\_\_\_

Telephone \_\_\_\_\_

I certify that I have installed \_\_\_\_\_ square feet of \_\_\_\_\_ (R-Value) insulation on \_\_\_\_\_ (date) at: \_\_\_\_\_ (location).

If air sealing:

Exposure of building: Well-Shielded , Normal, or Exposed: \_\_\_\_\_ No. of Stories \_\_\_\_\_

Contractor's Signature: \_\_\_\_\_

## Rebate Table

Insulation	Rebate
R-Value 19 - 29 per square foot	.25¢
R-Value 30 + per Square foot	.50¢

## WHAT IS INSULATION?

Insulation is any material that resists the flow of heat from one surface to another. Insulation retards the rate of heat escaping from the house in the winter and entering in the summer. Home insulation is available in blankets, batts, pouring wool, and blowing wool. Insulation is measured in R-Values, the higher the value the better. Look directly on the insulation for the R-value. One brand of insulation batts might be slightly thicker than another, but if both show the same R-value they'll perform equally.

Most homes are poorly insulated and in most cases the existing insulation can easily be improved.

## MN State Residential Energy Requirements

- Ceiling/Attic R-44, minimum
- Wood Framed Wall R-19, minimum
- Floors R-30, minimum

## ENERGY CONSERVATION PROGRAM INSULATION REBATE APPLICATION

## DID YOU KNOW?

- ⇒ You can reduce your energy cost by up to 30% with proper insulation and air sealing.
- ⇒ One of the most cost-effective ways to make your home more comfortable year-round is to add insulation to your attic.
- ⇒ Crawl spaces, walls and floors above the crawl space should be insulated.
- ⇒ Weatherstrip your attic door. If there is a 1/4 in. crack under the door, you will lose about \$5 worth of heat every winter.
- ⇒ Attic and crawl space ventilation is necessary and very important both for winter heating and summer cooling.

See back for R-Value requirements.

# General Terms and Conditions

This program offers financial incentives for the purchase of R-Valued insulation. To qualify for a rebate, an applicant must meet the following eligibility requirements:

- Applicant must be a Perham Natural Gas customer where the insulation is being installed.
- A final invoice for all material and labor must be attached to this rebate application.
- The insulation must be installed within twelve (12) months of application for rebate.
- Rebates will be paid directly to the applicant.
- To avoid delay, the invoice that is returned with your rebate application must include the R-Value and square feet of insulation purchased and installed.
- Rebate cap of no more than 50% of project cost; Maximum \$500.00 rebate per location per year.
- Renters may apply provided they have written authorization from the property owner.
- New construction does not qualify.

**THE "NATURAL" CHOICE**

## Tax Information

Perham Natural gas is not responsible for any tax consequences of the rebate program.

## Permit Requirements

Perham Natural Gas supports our City, County, and State permitting and inspection process. Applicants are to obtain these permits.

## Verification

The original sales receipt indicating date of purchase, contractor name, R-Value of insulation, and square feet of insulation installed must accompany the rebate application. Incomplete applications may be delayed. Perham Natural Gas reserves the right to verify sales receipts, cancelled checks, and installation.

## Disclaimer

The City of Perham does not guarantee that the implementation of energy-efficient measures will result in energy or cost savings. The City of Perham makes no warranties, express or implied, with respect to any equipment purchased or installed including, but not limited to, any warranty or fitness for purpose. In no event shall the City be liable for any incidental or consequential damages. Customers are solely responsible for the proper disposal of old insulation.

This program is subject to regulatory rules and orders. The City of Perham reserves the right to change any portion or to end this program without notice.
